R-01

Files received

one row per file, hash from the actual bytes

2 files received from Ontario Community College Owner Group (schedule custodian, demo) on 2025-07-02 by email attachment. Stated provenance, recorded verbatim: stated as exported from the project P6 database on 01-Jul-2025 (demonstration narrative). All files are listed; the SHA-256 digest is computed from the bytes as received.

File	Size	SHA-256
Ontario_Community_College_baseline.xer	199,388 bytes	37a454edfda707d797f2dab200919c1da729a17454e53b46084b6a17bc4819db
Ontario_Community_College_current.xer	252,063 bytes	7ed1cd8309b1752af74ec9c8d2fa11fbc9a58d4e065630a2589809ed3780ca10

R-02

Intake screen

stored-date logic screen, .xer files only

Stored-date logic screen over 487 finish-to-start relationships in Ontario_Community_College_baseline.xer: 2 relationship(s) are breached by ACTUAL dates (out-of-sequence progress or future-dated actuals) - a statusing finding about how progress was recorded, reported separately from data integrity.

Stored-date logic screen over 607 finish-to-start relationships in Ontario_Community_College_current.xer: 24 relationship(s) are breached by ACTUAL dates (out-of-sequence progress or future-dated actuals) - a statusing finding about how progress was recorded, reported separately from data integrity.

R-03

What this receipt covers

recorded scope

This receipt records what was received and what was screened. It does not attest to the authenticity of the source database: the stated provenance is the sender's statement, recorded as received.
