R-01

Register of simulation inputs

every input with its provenance; never truncated

Ranges without documented provenance from a workshop or the project risk register are analyst judgment, and they are labelled as analyst judgment in the register below. 1 of the 2 inputs below is labelled analyst judgment.

2 inputs listed. Every row is rendered; this register is never truncated.

#	Input	Type	Parameters	Source	Provider	Date	Note
1	Global duration uncertainty	uncertainty range (all activities)	triangular: optimistic 90%, most likely 100%, pessimistic 130% of planned duration	analyst judgment	Dana Fitkowski	2025-07-02	demonstration default; a client run elicits ranges in a workshop
2	R-01: Inspector availability extends into interior fit-out witnessing	discrete risk	probability 30%; impact +5% to +20% (mode +10%) of affected activity durations, pert; affects: A3240	project risk register	Northgate Constructors	2025-06-15	

R-02

What this record covers

recorded scope

This record documents where each risk input to the simulation came from. It is an input log, not a delay analysis and not an opinion on any claim.

Prepared by **Dana Fitkowski, Principal, Critical Path Partners** · Record date **2026-09-01** · Generated **2026-09-01 13:57 UTC** · Inputs **2** · Engine **cpm-engine v2.9.42**

Every input carries a documented source
